SUMMARY

AI solutions engineer with **9+ years building tools and automations** that make operations teams faster and more effective. At Intuit, designs and deploys **Claude-based AI agents** and automation workflows for internal teams - scoping opportunities with business stakeholders, building the solution, and measuring impact. At Entrata (100K+ MAU SaaS), worked across the full **client journey**: onboarding workflows, client-facing integrations, support tooling, and **dashboards and reporting** for operations leaders - all while collaborating with sales, product, and client teams throughout. Built independent AI projects including LeaseI (8-agent LangGraph system) and AgentProbe (Claude + 4 other LLM providers). Strong in **Python, SQL, REST APIs, AI agents, and explaining technical concepts to non-technical teams**. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

CORE COMPETENCIES

Claude-Based AI Agents & Automation | Python / SQL / REST APIs / Webhooks | Internal Tooling & Workflow Automation | Dashboards & Reporting & Business Insights | Client Onboarding & Client Experience Workflows | Cross-Department Collaboration | AI-Assisted Development (Claude Code) | Data Security & Sensitive Data Handling (PHI/HIPAA) | LLM Evaluation & AI Agents | AWS / Docker / GitHub Actions CI/CD | Non-Technical Stakeholder Communication | Process Improvement & Independent Execution

EXPERIENCE

Intuit

Jun 2026 -- Present

Software Engineer - AI Solutions - Virginia, USA

- **Design and deploy Claude-based AI agents and automation workflows** for internal business teams: identify process improvement opportunities, scope the solution with stakeholders, build it in Python/FastAPI, and measure adoption and time savings after launch.
- Serve as **technical point of contact for AI tool vendors**: evaluate third-party APIs, scope integration requirements, and drive delivery from discovery through go-live - partnering with TPMs and product managers throughout.
- Build **reporting pipelines and data outputs** that give business leaders visibility into AI system performance; present findings and recommendations to non-technical stakeholders in plain language.
- Implement **data security controls** around every AI integration: input validation, sensitive data handling, access controls, and audit logging for regulated financial data.

Entrata - Multifamily & Affordable Housing SaaS

Oct 2020 -- Jul 2024

Senior Software Engineer - 100K+ monthly active users

- Built tools and automations across the **full client journey**: onboarding workflows that reduced new client setup time, client-facing data integrations, and support tooling that cut issue triage time by 40%.
- Collaborated with **sales, product, onboarding, and client teams** to identify bottlenecks, translate business problems into technical solutions, and explain implementation tradeoffs to non-technical stakeholders including PMs and TPMs.
- Built **dashboards and reporting pipelines** (SQL, Python) giving operations leaders visibility into workflow performance; delivered large-scale data reconciliation workflows processing 1.6M+ records.
- Wrote Python/Bash **workflow automation** eliminating 80% of manual operational work; optimized 200+ SQL queries (30% performance gain); owned PHI/HIPAA data security end to end.
- Reviewed 300+ pull requests; mentored junior engineers; managed 20+ concurrent workstreams across 120+ Agile sprints.

Entrata India

Sep 2018 -- Oct 2020

Junior Software Engineer - Pune, India

- Built client onboarding and data import workflows (Python, PostgreSQL) for housing SaaS; delivered large-scale reconciliation pipelines (1.6M records).

PROJECTS

AgentProbe - Claude + Multi-Provider AI Agent Platform

Python · FastAPI · Anthropic Claude · 4 LLM Providers · APIs

15-endpoint FastAPI service integrating **Anthropic Claude** and four other LLM providers (OpenAI, Azure OpenAI, Groq, Ollama). Evaluates AI agent outputs on accuracy, hallucination rate, and compliance using LLM-as-judge. CI regression tests with golden datasets. Demonstrates hands-on experience building and evaluating **Claude-based agents** - exactly what CheckWriters is deploying for GTM workflows.

Demo: github.com/venkatalakshmiparimala/AgentProbe

CrashClarity - Data Analysis Dashboard (104K Records)

Python · R · scikit-learn · Interactive Dashboard · GitHub Pages

Built an end-to-end analytics pipeline on 104K+ records: data cleaning, ML modeling (Random Forest + Logistic Regression, 85%+ accuracy), and an **interactive reporting dashboard** for non-technical audiences. Demonstrates the reporting, insights, and data visualization work CheckWriters needs for operations leaders.

github.com/venkatalakshmiparimala

Leasel - 8-Agent AI Automation System

Python · LangGraph · FastAPI · RAG · Workflow Automation

End-to-end AI automation system: 8-agent LangGraph orchestration with RAG retrieval, workflow routing, confidence scoring, and human escalation. Built evaluation harness (93.6% precision across 1,240 test cases). Demonstrates independent scoping and delivery of a production-grade AI automation product.
