SUMMARY

Solutions engineer and technical operator with **7+ years in housing and multifamily PropTech** -- the exact domain EliseAI serves. At Entrata, owned technical integrations with external federal data sources, designed and shipped REST API workflows for utility billing, payments/ledger, and lease compliance data across a 100K+ MAU platform -- directly parallel to EliseAI's partner integration verticals. Managed **concurrent feature workstreams** across 120+ Agile sprints, coordinated with external technical stakeholders, and documented integration patterns for reuse. At Intuit, owning AI solution delivery end-to-end: scoping requirements, partnering with engineering on architecture and API decisions, and driving from discovery through go-live. Independently built **Leasel** -- an AI agent system for apartment lease compliance, the core of EliseAI's housing product. Strong Python, system architecture, REST APIs, data flows, and written communication across technical and non-technical teams. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

CORE COMPETENCIES

Technical Partnerships & Integrations | REST API Design & Integration Architecture | Solutions Engineering | Housing & PropTech Domain (Utility Billing, Payments, Lease) | Concurrent Workstream Management | External Technical Stakeholder Coordination | Python / SQL / System Architecture | Product Discovery & Requirements Scoping | Integration Documentation & Standardization | Go-live Execution & Deadline Management | AI Agent Workflows (LangGraph / RAG) | AWS (Lambda, S3, RDS, SQS) | Docker / Kubernetes / Terraform | Cross-functional Communication

EXPERIENCE

Intuit

Jun 2026 -- Present

Software Engineer -- AI Solutions & Technical Partnerships -- Virginia, USA

- **Own AI solution delivery end-to-end:** scope integration requirements with business stakeholders, partner with engineering on API architecture and data flow decisions, evaluate build-vs-workaround tradeoffs, and drive each initiative from discovery through go-live.
- Serve as **technical point of contact** for AI tool vendors and partners: evaluate third-party APIs, align on data needs and implementation approach, and unblock issues mid-build with internal engineering teams.
- Partner with **TPMs and product managers** to translate client-reported issues and business requirements into scoped technical solutions; own delivery timelines and keep technical and non-technical stakeholders aligned on tradeoffs and progress.
- Document integration patterns and **standardize reusable workflows**; build evaluation harnesses and test environments for AI solutions before production rollout.

Entrata -- Multifamily & Affordable Housing SaaS

Oct 2020 -- Jul 2024

Senior Software Engineer -- 100K+ monthly active users | utility billing, payments, lease, collections workflows

- **Served as primary technical contact for external vendor integrations** (HUD, Tax Credit federal data sources): worked directly with vendor technical teams to scope data requirements, debug API issues, coordinate go-live timelines, and resolve production incidents -- led triage calls and wrote root cause summaries for PMs and non-technical stakeholders.
- Built and maintained integrations spanning **utility billing, payments/ledger, lease compliance, and collections** workflows -- the exact partner verticals EliseAI's PSE role covers. Defined data flows, evaluated API capabilities, and documented patterns for reuse across the platform.
- Managed **20+ concurrent feature workstreams** across 120+ Agile sprints: scoped requirements with stakeholders, tracked dependencies, prioritized ruthlessly across competing go-live dates, and shipped on time.
- Designed **Docker microservices architecture** on AWS with Terraform (50% better scalability, 30% faster deployments); built Python/Bash automation eliminating 80% of manual operational workload; reviewed 300+ PRs.
- Optimized 200+ SQL queries via execution plan analysis (30% performance gain); led AWS S3 migration for PHI document storage.

Entrata India

2019 -- Oct 2020

Junior Software Engineer -- **Pune, India**

- Built housing product integrations (Python, PostgreSQL) for affordable housing, rental management, and large-scale data import workflows (1.6M HUD/Tax Credit records).

PROJECTS

Leasel -- AI Agent System for Apartment Lease Compliance

Python · LangGraph · FastAPI · RAG · Human-in-the-Loop

Independently scoped and shipped an AI agent product for **apartment lease compliance** -- the core of EliseAI's housing workflow. 8-agent LangGraph orchestration: triage, RAG retrieval, rule evaluation, confidence scoring, and human escalation. Defined integration architecture, test data setup, and validation harness (93.6% precision, 87.9% F1 across 1,240 test cases). Demonstrates end-to-end ownership of an AI product in the exact vertical.

AgentProbe -- Multi-Provider AI Integration Platform

Python · FastAPI · 5 LLM Providers · REST APIs · CI/CD

15-endpoint FastAPI service integrating five AI provider APIs (Anthropic, OpenAI, Azure OpenAI, Groq, Ollama) -- scoped the integration architecture, documented patterns for each provider, built sandbox test environments, and automated regression testing. Direct parallel to managing a portfolio of partner API integrations.
