PROFESSIONAL SUMMARY

Data and technology professional with 9+ years of experience in SQL, data pipelines, and enterprise system configuration - including one year as a Research Associate at George Mason University (College of Science, 2024-2025) supporting data-driven research workflows. M.S. Data Analytics Engineering, GMU (GPA 3.87, May 2026). Experienced with SQL querying, data segmentation, CRM platforms, and building automated workflows for operational teams. Strong attention to detail and a track record of managing complex, multi-step data processes independently.

CORE COMPETENCIES

SQL Queries & Data Segmentation | CRM Platforms (Salesforce) | Marketing Cloud / Automation Studio | Data Quality & Validation | Microsoft Office Suite (Excel, Word, PowerPoint, Teams, SharePoint) | Process Documentation | Automated Workflow Design | Python & R (Data Analysis) | PostgreSQL / Oracle / MySQL | Tableau / Power BI

EXPERIENCE

George Mason University - School of Business

2025 - 2026

Teaching Assistant · MIS (Management Information Systems) · Fairfax, Virginia

- Supported faculty in delivering MIS coursework covering database management, information systems, SQL querying, and enterprise application concepts to undergraduate students.
- Assisted students with SQL queries, data modeling exercises, and system analysis assignments; held office hours and provided one-on-one guidance on technical coursework.
- Graded assignments and maintained accurate student records; coordinated with faculty to update course materials, filters, and evaluation criteria each semester.
- Documented course processes, query examples, and system usage guides used by students and instructors across enrollment cycles.

Entrata - Multifamily & Affordable Housing SaaS

Oct 2020 - Jul 2024

Senior Software Engineer · Data & Systems · 100K+ MAU

- Wrote and maintained **complex SQL queries and stored procedures** for eligibility, rent calculation, and compliance reporting - optimized 200+ queries for 30% average performance gain.
- Built automated data workflows (Python, PL/SQL, Bash) that eliminated 80% of manual operational work - scheduled data imports, reconciliation checks, and validation pipelines.
- Configured and deployed SaaS modules for property management clients; documented configuration logic, integration points, and rollback procedures for each release.
- Managed annual HUD income-limit data imports: transformed federal source data into ~180,000 domain records with validation and audit checks - zero errors across 6 annual cycles.
- Coordinated with operations and compliance teams to update data filters, program codes, and reporting parameters each cycle.

Entrata India

Sep 2018 - Oct 2020

Junior Software Engineer · Pune, India

- Built data import, segmentation, and reconciliation pipelines for **1.6M HUD/Tax Credit records** - authored SQL validation logic to catch discrepancies before production.
- Created documentation for system configurations, query usage, and data processes used by operations teams across 50+ US states.

SELECTED PROJECT

CrashClarity - Road Accident Data Analysis (104K Records)

Python · R · SQL · scikit-learn · GitHub Pages

End-to-end data analysis pipeline on 104K+ UK accident records - SQL-driven data preparation, audience segmentation by severity/location/time, Random Forest and Logistic Regression models (85%+ accuracy), and an interactive dashboard. Demonstrates SQL querying, data filtering, and translating raw data into actionable audience segments.

EDUCATION

M.S. Data Analytics Engineering - George Mason University**, Fairfax, Virginia** May 2026

GPA 3.87 · Data pipelines, SQL systems, statistical modeling, ML, data visualization, process automation

B.Tech Computer Science & Engineering - JNTU Anantapur 2017

TECHNICAL SKILLS

Data & SQL: PostgreSQL, Oracle, MySQL, SQL Server, PL/SQL, query optimization, stored procedures, data segmentation, ETL, data quality validation

CRM & Marketing Platforms: Salesforce, Marketing Cloud (Automation Studio, Journey Builder, Data Extensions), CRM configuration and reporting

Microsoft Office: Excel (advanced), Word, PowerPoint, Outlook, Teams, SharePoint, Visio

Analysis & Visualization: Python (Pandas, NumPy, scikit-learn), R, Tableau, Power BI, ggplot2, Quarto

Cloud & Tools: AWS (S3, RDS), Azure, GitHub, Docker, Asana, project management tools
