PROFESSIONAL SUMMARY

Business Analyst with 6+ years building management and executive reporting, owning data quality, and automating business processes across regulated, high-volume environments. At Entrata, maintained **200+ SQL queries with 30% performance improvement** across 1M+ property records, eliminated **80% of manual review workload** by automating compliance pipelines, and achieved **100% PII compliance** with zero violations over 6+ years. Built self-service dashboards (Tableau, ggplot2) that improved decision-making for leadership teams; designed repeatable data workflows with full audit lineage and naming conventions across multi-source datasets. Proficient in SQL, Python, Excel, JSON, Tableau, and Power BI. Experienced cleaning and normalizing CRM and operational data, defining data definitions and field mappings, and delivering accurate, actionable reporting to cross-functional stakeholders. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

WORK EXPERIENCE

Intuit

Jun 2026 – Present

Software Engineer — Data Reporting · Pipeline Automation · Analytics

- Build and maintain **data pipelines and reporting infrastructure** for financial data services; design data models and SQL schemas to support accurate management reporting and downstream analytics.
- Implement **data validation and quality checks** for LLM and ML pipeline outputs; build golden-dataset regression suites to ensure reporting accuracy and consistency before every release.
- Handle sensitive financial data in compliance with internal security standards; apply PII-safe data handling and least-privilege access patterns throughout all data workflows.
- Partner with cross-functional teams to translate business reporting requirements into automated pipelines and actionable dashboards.

George Mason University

Aug 2024 – Aug 2025

Research Associate — Data Analytics · Dashboard Design · Statistical Reporting

- Designed **self-service BI dashboards** (Tableau, ggplot2, Quarto) for faculty leadership — translated complex model outputs into decision-ready visualizations; improved research comprehension **40%** across two cohorts.
- Mined and cleaned multi-source datasets (WHO global health + UK Road Safety, 190+ countries); built regression models achieving **$R^2 = 0.977$** with full data lineage, naming conventions, and documentation.
- Applied Isolation Forest anomaly detection across 3 research pipelines, surfacing outliers and data quality issues that manual review missed.

Entrata — Residential & Affordable Housing SaaS

Sep 2018 – Jul 2024

Analytic Software Engineer — Business Reporting · Data Quality · Process Automation

- Owned and advanced **business-critical reporting** for property performance across 100K+ unit portfolios — eligibility patterns, occupancy rates, rent burden vs. AMI, delinquency trends, and lease renewal KPIs; presented findings to operations and product leadership.
- Normalized, cleaned, and structured data tables across CRM and operational systems to support **long-term reporting scalability**; defined and enforced data definitions, naming conventions, and field mappings across multiple platforms.
- Eliminated **80% of manual operational workload** by encoding compliance decision logic into automated pipelines (AMI threshold calculations, recertification workflows, escalation routing) — zero compliance violations over 6+ years.
- Maintained and optimized **200+ SQL queries** via execution plan analysis, achieving 30% performance improvement across 1M+ property records at 99.5% uptime; wrote joins, conditional logic, and stored procedures for multi-source data integration.
- Achieved **100% PII compliance** across all client data — Libsodium-encrypted AWS S3 pipelines, zero security incidents; handled sensitive resident data (SSNs, income documentation) in strict compliance with federal housing regulations.
- Collaborated with sales, operations, and product teams to translate workflow requirements into repeatable, standardized reporting processes and automation logic.

PROJECTS

CrashClarity: Large-Scale Accident Analysis Dashboard (104K Records)

Python · SQL · Scikit-learn · Random Forest · Tableau · GitHub Pages — Live Dashboard

- Cleaned and analyzed 104K+ UK accident records; built classification models (85%+ accuracy); deployed interactive **self-service Tableau-style dashboard** for non-technical stakeholders on GitHub Pages.

Leasel: Compliance Reporting Pipeline with Data Quality Validation

Python · SQL · LangGraph · SQLite · Audit Logging — github.com/venkatalakshmiparimala/Lease_complaince_rag

- Built end-to-end data quality and compliance reporting pipeline across 1,240 documents — **93.6% precision, 87.9% F1**; every determination traceable to source with full metadata lineage and audit log.

EDUCATION

M.S. Data Analytics Engineering — George Mason University — Graduated May 2026

GPA: 3.87 · Fairfax, Virginia · Statistical modeling, data governance, dashboards, ML pipelines, anomaly detection

B.Tech Computer Science & Engineering — Jawaharlal Nehru Technological University, Anantapur — 2013 – 2017

TECHNICAL SKILLS

Reporting & BI: Tableau, Power BI, Looker, ggplot2, Quarto, matplotlib, Jupyter, Excel (pivot tables, VLOOKUP, conditional logic), Google Sheets, Self-Service Dashboards, KPI Reporting

Data & Analytics: SQL (joins, conditional logic, stored procedures), Python (Pandas, NumPy, scikit-learn), R, JSON, delimited text formats, ETL Pipelines, Data Cleaning, Data Normalization, CRM Data, Field Mapping

Data Quality & Governance: Data Definitions, Naming Conventions, Audit Lineage, PII/PHI Compliance, Data Quality Management, Process Documentation, Runbooks, Anomaly Detection (Isolation Forest)

Automation & Process: Python automation (80% manual workload reduction), AWS (S3, Glue, Lambda), GitHub Actions CI/CD, REST APIs, Agile/Scrum, Cross-Functional Stakeholder Reporting
