SUMMARY

Senior agentic AI platform engineer with **7+ years in multifamily and affordable housing SaaS** - the exact domain RealPage serves. At Entrata (RealPage's direct competitor, 100K+ MAU), built the production Python pipelines, async execution systems, distributed workflows, and AWS infrastructure that downstream product teams depended on - the same platform engineering pattern this role supports. Now at Intuit, **building and operating production agentic AI systems**: orchestration, tool integrations, observability, release discipline, and reusable platform capabilities. Built **AgentProbe** - an open-source multi-provider LLM platform that is exactly the kind of reusable evaluation substrate this role calls for. Built **Leasel** - an 8-agent LangGraph system demonstrating production-grade orchestration, runtime, stateful execution, and human-in-the-loop controls (93.6% precision). Strong in **Python, LangGraph, distributed systems, AWS, Terraform, GitHub Actions CI/CD, observability**. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

CORE COMPETENCIES

Agentic AI Orchestration & Runtime (LangGraph) | Reusable Platform Capabilities & Shared Tooling | Tool Integrations & Workflow Automation | Distributed Systems & Async Execution (RabbitMQ, SQS) | Observability / Monitoring / Alerting (Prometheus, Grafana) | LLM Evaluation & LLMOps CI/CD Pipelines | Python / SQL / REST APIs / FastAPI | AWS (S3, EC2, RDS, Lambda, SQS, IAM) | Docker / Kubernetes / Terraform / GitHub Actions | Release Discipline & Production Support | Multifamily & Affordable Housing SaaS Domain | Code Review & Engineering Mentorship

EXPERIENCE

Intuit

Jun 2026 -- Present

Software Engineer - Agentic AI Platform - Virginia, USA

- **Build and operate production agentic AI platform services**: agent orchestration (LangGraph), tool integrations, stateful runtime execution, structured outputs, and reusable workflow automation capabilities used across product teams.
- Implement **observability, monitoring, dashboards, and alerting** for agent systems: LLMOps instrumentation, CI/CD evaluation pipelines (LLM-as-judge + golden datasets), regression testing, and post-release production support.
- Identify repeated implementation patterns across product teams and **turn them into shared platform capabilities** - reducing duplicated orchestration, runtime, and evaluation work.
- Partner with product, QA/Eval, and operations stakeholders through release discipline, rollout planning, incident response, and continuous improvement cycles.

Entrata - Multifamily & Affordable Housing SaaS

Oct 2020 -- Jul 2024

Senior Software Engineer - 100K+ monthly active users · RealPage's direct competitor

- Built and operated **platform-level production systems** that product teams across Entrata depended on: async execution pipelines (RabbitMQ), distributed data workflows processing 1.6M+ records, REST API integrations with federal data sources (HUD, Tax Credit), and shared debugging tooling that reduced triage time by 40%.
- Owned **observability and reliability infrastructure**: monitoring, logging, alerting, incident response, and root cause analysis across production services - led triage calls and wrote RCAs for non-technical stakeholders.
- Identified recurring implementation patterns and **built reusable automation**: Python/Bash tooling eliminating 80% of manual operational work; standardized integration workflows adopted across teams.
- Owned **Terraform IaC and GitHub Actions CI/CD**: Docker microservices on AWS (50% better scalability, 30% faster deployments); full release discipline across environment promotion, rollback, and secret management.
- Reviewed 300+ pull requests; mentored junior engineers; managed 20+ concurrent workstreams across 120+ Agile sprints.

Entrata India

Sep 2018 -- Oct 2020

Junior Software Engineer - **Pune, India**

- Built production Python/Java/PostgreSQL modules for multifamily and affordable housing SaaS; delivered large-scale data pipelines (1.6M records) with validation and reconciliation.

PROJECTS

AgentProbe - Reusable Multi-Provider LLM Platform

Python · FastAPI · LangGraph · 5 LLM Providers · LLMOps · CI/CD

15-endpoint FastAPI platform integrating five LLM providers with **standardized orchestration, tool integration patterns, and evaluation infrastructure** - exactly the reusable platform capability this role builds. LLMOps CI/CD pipeline (LLM-as-judge + golden datasets) for regression testing across provider updates. Demonstrates turning repeated AI implementation patterns into shared, reusable infrastructure.

github.com/venkatalakshmiparimala/AgentProbe

Leasel - Production Agentic AI System for Housing Compliance

Python · LangGraph · FastAPI · Distributed Orchestration · HITL · Observability

End-to-end agentic AI system demonstrating production platform engineering: **8-agent LangGraph orchestration, stateful runtime execution, tool calling, async workflows, human-in-the-loop escalation**, and confidence-gated autonomy controls. Full evaluation harness integrated into CI/CD: 93.6% precision, 87.9% F1 across 1,240 test cases. Built for a housing compliance domain - directly relevant to RealPage's product teams.
