PROFESSIONAL SUMMARY

Software Engineer with 7 years of experience across support engineering and full-stack production engineering in property management and real estate SaaS. Proficient in Python, PHP, JavaScript, SQL, and cloud infrastructure (AWS). Experienced building and maintaining production modules for large-scale platforms serving 100K+ monthly active users - backend services, data pipelines, compliance workflows, and database optimization. Comfortable working independently and collaborating cross-functionally across engineering, product, and operations teams.

WORK EXPERIENCE

Entrata — PropTech / Real Estate SaaS

2021 – 2024

Software Engineer — Lehi, UT (Remote)

- **Built and maintained full-stack production modules** (PHP, Python, PostgreSQL, JavaScript) for a property management platform serving 100K+ monthly active users — backend APIs, database schemas, UI components, and integration workflows across 20+ modules.
- **Developed compliance and financial workflows** for affordable housing and property management: income eligibility verification, HUD payment processing, rent pricing, tax credit calculations, and ledger management — zero federal/state compliance violations.
- **Optimized 200+ SQL queries** across production environments (30% performance gain) through execution plan tuning, indexing, partitioning, and caching strategies; maintained 99.5% uptime over 6+ consecutive months.
- **Built AWS data pipelines** (S3, Glue, RDS, EC2) for real-time financial operations across large-scale property portfolios; achieved 100% PHI compliance on data migration using Libsodium encryption — zero security incidents.
- **Led microservices redesign** using Docker — 50% improvement in system scalability, 30% reduction in deployment time; converted 20% of product modules into service-based architecture.
- Conducted 300+ peer code reviews; automated internal workflows via Python/Bash scripting eliminating 80% of manual operational workload; mentored junior engineers.

Entrata — PropTech / Real Estate SaaS

2017 – 2021

Support Engineer — Pune, India

- **Provided technical support and troubleshooting** for property management applications across affordable housing and rental management modules — resolving production issues, debugging backend workflows, and coordinating fixes with engineering teams.
- **Built and maintained compliance and document workflows**: state-specific housing certification documents, income limits data processing, and client document management across AWS S3 storage.
- **Migrated client documents** from legacy server storage to AWS S3, resolving 90% of legacy space constraints; redesigned document storage database architecture and provided 6 months of post-deployment stabilization.
- Participated in sprint planning, daily standups, peer code reviews, and QA testing; contributed to debugging and performance improvements across production modules.

EDUCATION

M.S. Data Analytics Engineering — George Mason University, Virginia — May 2026

GPA: 3.87

B.Tech Computer Science & Engineering — JNTU Anantapur — 2017

SKILLS

Languages: Python, PHP, JavaScript, SQL, PL/SQL, TypeScript, Bash, HTML/CSS

Backend: FastAPI, REST APIs, RabbitMQ, Microservices, PostgreSQL, MySQL, Oracle

Cloud & Infra: AWS (S3, EC2, RDS, Glue), Docker, GitHub Actions CI/CD, ETL, Data Pipelines, Linux **Tools:** Git, Agile/Scrum, JIRA, Tableau, Jupyter
