Virginia, USA (open to NYC relocation)

PROFESSIONAL SUMMARY

Software engineer with 8 years in property management technology at Entrata - the exact domain Haven is automating. Built production systems for maintenance workflows, tenant lease compliance, HUD/LIHTC eligibility, and affordable housing operations at 100K+ monthly active users. Built **Leasel**, an 8-agent LangGraph HITL platform that automates property compliance investigation with 93.6% precision, and **AgentProbe**, an open-source LLM evaluation toolkit. Currently deploying Anthropic Claude into financial workflows at Intuit. Strong in TypeScript, Node.js, Python, and MongoDB. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026). Case studies: Leasel · AgentProbe

CORE COMPETENCIES

Property Management Domain (8 yrs) | LLM Agents (LangGraph) | RAG Pipelines | LLM Evaluation / Evals | TypeScript / Node.js | Python (9+ yrs) | MongoDB | FastAPI / REST APIs | Fine-tuning (HuggingFace) | AWS / Docker / Kubernetes | Full-Stack (React / TypeScript) | Multi-Agent Orchestration

EXPERIENCE

Intuit

Jun 2026 - Present

Software Engineer · Virginia, USA

- Deploy Anthropic Claude into production financial data workflows -- design LLM APIs, structured-output schemas, and retrieval pipelines that ground answers in source records.
- Build CI eval harnesses (LLM-as-judge + golden datasets) that block hallucinations and quality regressions before every release.
- Write guardrails around LLM calls: input validation, sensitive-data handling, output checks. Build FastAPI backends and React/TypeScript front ends; ship via GitHub Actions CI/CD to AWS.
- Build ML pipelines with scikit-learn and XGBoost from data ingestion through prediction APIs.

Entrata

Oct 2020 - Jul 2024

Senior Software Engineer · Multi-tenant SaaS, 100K+ monthly active users

- Built and owned production systems for the exact workflows Haven automates: maintenance request processing, tenant communication, lease compliance, vendor coordination, and affordable housing eligibility.
- Maintained the annual HUD income-limit import for 7 years -- transforming federal source data into ~180,000 domain records driving eligibility, rent, and compliance for 100K+ housing units; zero violations.
- Built RabbitMQ async processing for rent updates across thousands of tenant records; retry logic and idempotency eliminated double-processing in production.
- Ran Python/Bash automation cutting manual ops work by 80%; optimized 200+ SQL queries (30% performance gain); led Docker microservices redesign (50% better scalability).
- Owned AWS S3 PHI migration with Libsodium encryption -- 100% compliance, zero security incidents.

Entrata India

Sep 2018 - Oct 2020

Junior Software Engineer · Pune, India

- Built property management modules (Python, PHP, Java, PostgreSQL); delivered large-scale data import workflows (1.6M HUD/Tax Credit records); led AWS S3 cloud migration.

PROJECTS

Leasel -- Autonomous Property Management AI Platform github.com/venkatalakshmiparimala/Lease_complaince_rag

93.6% precision, 87.9% F1 on 1,240 eval cases. 8-agent LangGraph HITL system that automates lease compliance investigation for property management: classifies tenant issues, retrieves relevant rules and historical context, generates evidence-backed resolution paths, and escalates to staff when confidence is low. Hand-rolled hybrid RAG (TF-IDF + semantic reranking), cited answers, LLM-as-judge CI. Core rule enforced in code: LLM reasons, human decides every regulated/financial call.

Python · LangGraph (8-agent) · FastAPI · Streamlit · Hybrid RAG · SQLite · CI/CD · LLM-as-Judge · HUD API

AgentProbe -- Open-Source LLM Evaluation Toolkit github.com/venkatalakshmiparimala/AgentProbe

15-endpoint FastAPI backend routing across 5 LLM providers with LLM Router. 5-metric LLM-as-judge eval engine (factual accuracy, hallucination, retrieval, completeness, compliance). CI regression tests on golden datasets - used to validate LeaseI across 1,240 test cases. Runs 100% locally at zero cost.

Python · FastAPI · LangGraph · ChromaDB · GitHub Actions · Anthropic · OpenAI · Groq · Ollama

AI on FHIR -- Clinical NLP & LLM API Integration github.com/venkatalakshmiparimala/AI_on_FHIR

LLM + BERT + embeddings translate English/Spanish questions into FHIR API calls -- reduced manual lookup time by ~60%. HIPAA-compliant role-based access control; Docker containerized.

Python · Flask · React · TypeScript · Docker · BERT · spaCy · LLMs · FHIR REST APIs

EDUCATION

M.S. Data Analytics Engineering — George Mason University, Virginia May 2026

GPA 3.87 · NLP pipelines, fine-tuning (HuggingFace + PyTorch), anomaly detection, regression modeling (R^2=0.977)

B.Tech Computer Science & Engineering — JNTU Anantapur 2017

TECHNICAL SKILLS

AI & LLMs: LLM APIs (Anthropic Claude, OpenAI, Groq, Ollama), RAG Pipelines, Hybrid Search, Embeddings, Prompt Engineering, AI Agents, LangGraph, LangChain, Human-in-the-Loop, LLM-as-Judge Evaluation, Fine-tuning (HuggingFace, PyTorch), MCP

Languages & Web: Python (9+ yrs), TypeScript, JavaScript, Node.js, React, Java, Spring Boot, PHP, SQL, Bash

Databases: PostgreSQL, MongoDB, MySQL, Redis, SQLite, Snowflake, ETL Pipelines, Query Optimization

Frameworks & APIs: FastAPI, Flask, Django, Express, REST APIs, GraphQL, RabbitMQ, Kafka, Celery

Cloud & DevOps: AWS (S3, EC2, Lambda, Glue, SQS, API Gateway, IAM), Azure (OpenAI, AKS), GCP (Vertex AI), Docker, Kubernetes, Terraform, GitHub Actions CI/CD

ML: scikit-learn, XGBoost, PyTorch, PySpark, ChromaDB, Pinecone, BERT, spaCy, HuggingFace, Prometheus, Grafana
