Virginia, USA · Authorized to work in the US (F-1 OPT)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of hands-on experience in **data collection, cleaning, and analysis** across large operational datasets, delivering **dashboards and reports** that drive **process improvement** and **supply chain and logistics** performance. Skilled in **SQL, Python, R, Tableau, and Power BI** for inventory analysis, operational reporting, and stakeholder communication. Track record of identifying inefficiencies in operational data and translating findings into **actionable recommendations** for business and procurement teams. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

CORE COMPETENCIES

Data Collection & Cleaning | Supply Chain & Logistics Analytics | Inventory & Operational Reporting | SQL & Database Querying | Python & R for Data Analysis | Tableau & Power BI Dashboards | Microsoft Excel | Process Improvement | Data Accuracy & Reporting Quality | Stakeholder Communication | ERP Systems (Oracle) | Cross-Functional Collaboration

EXPERIENCE

George Mason University — Research Associate / Teaching Assistant

Aug 2024 – May 2026

Software Analyst · Statistical Analysis · Tableau · Python · R

- **Collected, cleaned, and analyzed** large operational datasets (WHO and UK Road Safety datasets, 190+ countries) using Python and R — multi-source **data collection**, transformation, and validation pipelines; achieved $R^2 = 0.977$ regression accuracy driving **actionable insights** for stakeholder decision-making.
- Built **Tableau and Power BI dashboards** tracking operational metrics across two research cohorts — improved stakeholder comprehension by 40%; automated **data accuracy** checks using anomaly detection to identify inconsistencies across 3 data pipelines before reporting.
- Presented **analytical findings and recommendations** to faculty and leadership stakeholders; mentored 600+ students in SQL, Python, data analysis methods, and Excel-based data management.

Entrata (PropTech / Real Estate SaaS)

2021 – Aug 2024

Software Analyst · Operations & Supply Chain Analytics · SQL · Python · Oracle

- **Analyzed supply chain and operational data** across 100K+ unit portfolios: tracked **inventory** availability, unit turnover rates, and procurement timelines; built **dashboards and reports** monitoring operational performance metrics, recertification compliance rates, and vendor procurement workflows — identified trends and inefficiencies that drove **process improvement** initiatives reducing manual workload by 80%.
- **Collected, cleaned, and analyzed logistics data** from multiple sources (Oracle, PostgreSQL, MySQL): designed SQL queries processing 1.6M+ records across 5 US states; maintained **data accuracy and reporting quality** through audit tables, validation pipelines, and automated data integrity checks — 30% improvement in query performance.
- Collaborated with **supply chain, operations, procurement, and business teams** to deliver **data-driven decision-making** support: cross-functional reporting for compliance, finance, and product stakeholders; translated analytical findings into clear recommendations presented to non-technical audiences.
- Worked with **ERP systems (Oracle)** for financial and operational data management; developed **Excel** and SQL-based reporting tools for inventory and procurement tracking across client environments.

Entrata India (Db Xento Systems)

Jan 2017 – 2021

Software Analyst · Operational Reporting · SQL · Process Improvement

- Built **operational data pipelines** processing 1.6M+ records; developed SQL-based **inventory management** and reporting workflows; automated compliance and procurement documentation processes reducing manual data entry; collaborated with operations teams on **process improvement** and data quality initiatives.

PORTFOLIO PROJECTS

CrashClarity — Large-Scale Operational Data Analysis & Dashboard (104K Records) SQL Python Tableau Process Improvement

2025 · Python, R, scikit-learn, Tableau, GitHub Pages · View Project

- End-to-end **data collection, cleaning, and analysis** of 104K+ operational records (UK transportation data) — identified trends, inefficiencies, and opportunities for **process improvement** across behavioral and environmental variables; built interactive **Tableau dashboard** presenting **analytical findings and recommendations** to stakeholders; 85%+ model accuracy.

EDUCATION

M.S. Data Analytics Engineering — George Mason University, Virginia — May 2026 · GPA 3.87

Coursework: Statistical Analysis, Supply Chain Analytics, Data Mining, Data Visualization, Database Systems, Business Analytics

B.Tech Computer Science & Engineering — JNTUA, India — 2013–2017

TECHNICAL SKILLS

Data Analysis: SQL (PostgreSQL, MySQL, Oracle), Python (Pandas, NumPy, scikit-learn), R, Microsoft Excel, Data Collection, Data Cleaning, Data Accuracy, Reporting Quality, Statistical Analysis

Visualization & BI: Tableau, Power BI, Business Intelligence, Dashboard Design, Operational Reporting, Matplotlib, Seaborn, ggplot2

Supply Chain & Operations: Supply Chain Analytics, Logistics Reporting, Inventory Management, Procurement Analytics, Process Improvement, Operational Performance Metrics, ERP Systems (Oracle)

Other: AWS S3, Python Automation, ETL Pipelines, Data Pipelines, Cross-Functional Collaboration, Stakeholder Communication, Agile/Scrum
