Venkata Lakshmi Parimala Pasupuleti

BI Data Analyst · Data Quality Management · Snowflake · Python · SQL · AWS · Financial Services Data Governance

+1-703-261-5410 | venkatalakshmiparimalap@gmail.com | linkedin.com/in/venkata-lakshmi-parimala-pasupuleti | github.com/venkatalakshmiparimala | Virginia, USA

PROFESSIONAL SUMMARY

BI Data Analyst with 7+ years **partnering with business stakeholders to translate requirements into dashboards, metrics, and data visualizations** that drive meaningful insights on business strategies — in financial services and regulated compliance environments. Deep expertise in **data quality management: metadata, lineage, and business definitions** across 1M+ financial records at production scale, including **structured and unstructured data** across SQL databases, **Snowflake data warehouses**, and document pipelines. At Entrata, maintained **100% PHI compliance with zero violations** over 7+ years, built automated data quality monitoring pipelines on **AWS (S3, EC2, RDS, Glue)**, and optimized **200+ SQL queries for 30% performance improvement**. Currently at Intuit designing BI tools and **executing data quality monitoring suites** for financial analytics. Built multi-source statistical models achieving **$R^2 = 0.977$** (Python, R) and **85%+ classification accuracy on 104K+ records**. M.S. Data Analytics Engineering, George Mason University (GPA 3.87, May 2026).

WORK EXPERIENCE

Intuit

Jun 2026 – Present

Software Engineer — BI & Data Quality · Financial Analytics

- **Partner with business stakeholders to translate financial analytics requirements** into BI dashboards, metrics, and data services (React/TypeScript, FastAPI) — surfacing insights on business strategies to internal decision-makers; maintain **metadata standards, data lineage, and business definitions** across all Snowflake and AWS pipeline assets.
- **Build and execute data quality monitoring tools**: automated regression suites (golden datasets + quality checks) that detect data quality regressions and model drift before production releases; collaborate with Tech teams to **manage security mechanisms and data access governance** with structured audit trails grounding model outputs in customer financial records.
- Build end-to-end ML pipelines (scikit-learn, XGBoost) on **Snowflake** and AWS from data ingestion and feature engineering through model evaluation and prediction APIs; ship via GitHub Actions CI/CD.

Entrata — Multifamily & Affordable Housing SaaS

Jan 2017 – Jul 2024

Analytic Software Engineer — BI & Data Governance · Compliance Analytics · Income Fraud Detection

- **Acted as BI consultancy partner** to property managers and compliance officers: translated business needs across Section 8/HCV, LIHTC, and HUD portfolios into **performance dashboards and data visualizations** tracking eligibility approval/denial patterns, waitlist demand by income band, occupancy, rent burden vs. AMI, delinquency, and lease renewal trends — driving meaningful insights on portfolio business strategies.
- **Drove adherence to data quality management principles** — maintained **metadata, lineage, and business definitions** across 1M+ financial records; built and executed **tools to monitor and report on data quality**, flagging income documentation inconsistencies before they reached downstream compliance reporting; collaborated with Tech teams to **manage security mechanisms and data access governance** via AWS S3 Libsodium-encrypted pipelines with role-based access controls — **100% PHI compliance, zero incidents**.
- Eliminated **80% of manual eligibility review workload** with zero compliance violations by encoding LIHTC/Section 42, HCV, and HUD compliance logic into automated **Snowflake-backed** pipelines — AMI threshold calculations, recertification workflows, and escalation routing across 100K+ unit portfolios; optimized **200+ SQL queries for 30% performance improvement** across 1M+ records at 99.5% uptime; delivered across **120+ Agile sprints**.

PROJECTS

Leasel: Financial Data Quality & Compliance Audit Pipeline

Data Quality · Governance

Python · LangGraph · scikit-learn · SQLite · reportlab — github.com/venkatalakshmiparimala/Lease_complaince_rag

- Built an end-to-end **financial data quality and governance pipeline** across 1,240 **unstructured documents** (lease PDFs) — feature extraction, rule-based classification, and deterministic audit engine with **full metadata and lineage**; achieved **93.6% precision, 87.9% F1** across 10 compliance rules; every determination traceable and audit-ready.

CrashClarity: Strategic Analytics on 104K Records with Self-Service Dashboard

BI · Analytics

Python · R · scikit-learn · Random Forest · Logistic Regression · Feature Engineering · GitHub Pages — Live Dashboard

- Mined 104K+ UK accident records — built Random Forest + Logistic Regression ensemble with feature engineering achieving **85%+ classification accuracy**; deployed interactive **self-service BI dashboard** translating model outputs into strategic insights for non-technical stakeholders.

Real Estate Price Analysis: Connecticut Property Market (2001–2022)

ML · Statistical Modeling

Python · XGBoost · Random Forest · Pandas · Matplotlib · Seaborn · Feature Engineering

- Socioeconomic impact analysis of Connecticut residential property prices across two decades; XGBoost and Random Forest models on assessed value, sale ratio, property type, and geographic features achieving **$R^2 = 0.977$**; surfaced key price drivers across income brackets and property classes.

EDUCATION

M.S. Data Analytics Engineering — George Mason University — Graduated May 2026

GPA: 3.87 · Fairfax, Virginia · Statistical modeling, data governance, ML pipelines, anomaly detection, data visualization

B.Tech Computer Science & Engineering — Jawaharlal Nehru Technological University, Anantapur — 2013 – 2017

TECHNICAL SKILLS

Data Governance & Quality: Data Quality Management, Metadata & Lineage, Business Definitions, Audit Pipelines, PHI/HIPAA Compliance, Zero-Incident Data Migrations, LIHTC/HCV/HUD Regulatory Workflows, Access Governance, Security Controls, Data Quality Monitoring Tools

Analytics & Modeling: Python, R, SQL, PL/SQL, Spark, Statistical Modeling, Regression Analysis, Random Forest, Logistic Regression, XGBoost, Isolation Forest, Feature Engineering, Cross-Validation, scikit-learn, Pandas, NumPy

Cloud & Data Infrastructure: AWS (S3, EC2, RDS, Glue), Snowflake, ETL Pipelines, PostgreSQL, MySQL, SQLite, MongoDB, Docker, CI/CD (GitHub Actions), Git, Linux

BI & Visualization: Tableau, Power BI, ggplot2, Quarto, Matplotlib, Seaborn, Jupyter, Data Visualization, Self-Service Dashboards

Process & Methodology: Agile/Scrum (120+ sprints), Lean, Six Sigma, FastAPI, REST APIs, TypeScript, JavaScript
