Venkata Lakshmi Parimala Pasupuleti

AI Operations Engineer · Agents · Evals · Customer Integrations · Internal Tooling · Production AI · Claude Code · Python · AWS

+1-703-261-5410 | venkatalakshmiparimala@gmail.com | linkedin.com/in/venkata-lakshmi-parimala-pasupuleti | github.com/venkatalakshmiparimala | Fairfax, Virginia, USA

SUMMARY

AI engineer who builds agents and automation that actually gets used in production - not prototypes. Built **Leasel** from blank page: an 8-agent LangGraph platform that handles messy real-world compliance documents (OCR ingestion, hybrid search RAG, tool calling, HITL escalation for regulated decisions, prompt injection defenses). Built **AgentProbe** - an open-source eval platform with LLM-as-judge scoring, golden datasets, CI regression gating, and cost-aware multi-provider routing - because I needed reliable evals before shipping AI and existing tools didn't do what I wanted. Currently at Intuit integrating Anthropic Claude into production financial services: customer-facing RAG pipelines, structured outputs, guardrails, evaluation harnesses. At Entrata (7+ years, 100K+ users), owned mission-critical backend systems end-to-end in a regulated property management SaaS - the kind of platform where wrong answers have real consequences. Security-minded from the start: PHI encryption, HIPAA-style access controls, no unsafe writes. Use Claude Code and AI coding tools daily. M.S. Data Analytics Engineering, George Mason University (GPA 3.87).

CORE COMPETENCIES

AI Operations · Ops Engineering · Internal Tooling | AI Agents · LangGraph · Tool Calling · Orchestration | Agent Evals · Production Monitoring · LLM-as-Judge | RAG Pipelines · Hybrid Search · Embeddings · OCR Ingestion | Customer Integrations · Data Syncs · API-Driven Automation | Human-in-the-Loop (HITL) · Guardrails · Safety Controls | Security-Minded · PHI/HIPAA · Prompt Injection Defense | Reusable Tools · Playbooks · Pattern Extraction | Claude Code · AI Coding Tools · Daily Practice | Anthropic Claude · OpenAI · AWS Bedrock · Multi-Provider | Python · FastAPI · TypeScript · Node.js | AWS (Lambda · S3 · SQS · API Gateway) · Docker · CI/CD | Messy Real-World Documents · Domain Process Automation | Zero-to-One Builder · Founding Contributor · Owner's Mindset

EXPERIENCE

Software Engineer

Jun 2026 - Present

Intuit — Virginia, USA

- **Customer-facing AI operations:** Build and operate Anthropic Claude integrations in production Python/FastAPI financial services - RAG pipelines grounding answers in customer data, prompt and context design for consistent structured outputs, data syncs between customer records and retrieval layer; no unsafe writes, no data leaks.
- **Evals and monitoring:** Build LLM-as-judge evaluation harnesses with golden datasets and CI regression gates to catch quality drops before release; implement guardrails with input validation, sensitive-data handling, and fallbacks; document patterns and reusable tooling for team adoption.
- Build ML data pipelines (scikit-learn, XGBoost); React/TypeScript front ends; Docker + GitHub Actions CI/CD to AWS with CloudWatch monitoring.

Senior Software Engineer

Oct 2020 - Jul 2024

Entrata — Apartment & Affordable Housing SaaS (regulated multi-tenant, 100K+ monthly active users)

- Owned mission-critical backend systems end-to-end in a regulated property management platform - HUD income-limit compliance ETL (180K records, zero violations across 6 years), async event-driven processing for rent updates across thousands of tenant records, PHI-compliant AWS S3 migration (Libsodium encryption, 100% coverage, zero incidents).
- Built Python/Bash automation that eliminated 80% of manual operational workload; internal debugging tools cutting triage time by 40%; led Docker microservices redesign (50% scalability improvement). Mentored 5+ engineers; 300+ code reviews across 120+ Agile sprints.

Junior Software Engineer

Sep 2018 - Oct 2020

Entrata India — Pune

- Built property management modules (Python, PHP, Java, PostgreSQL); delivered large-scale data integration workflows (1.6M records); led AWS S3 migration from legacy storage.

PROJECTS

Leasel - Production AI Ops Platform: Agents · RAG · Evals · HITL 2026 | Python, LangGraph (8-agent), FastAPI, ChromaDB, CI/CD | github.com/venkatalakshmiparimala/Lease_complaince_rag

- Built from scratch to handle messy real-world lease documents: OCR ingestion pipeline, section-aware chunking, hybrid search RAG (TF-IDF + semantic reranking, citation grounding), 8-agent LangGraph workflow with tool calling and durable state. **Security-first:** prompt injection defenses, least-privilege access, audit logging on every agent action; HITL hard-coded so regulated decisions never go to the LLM alone. **Evals and monitoring:** CI regression harness with LLM-as-judge scoring - 93.6% precision, 87.9% F1 across 1,240 test cases. Three consuming surfaces share one data and retrieval layer.

AgentProbe - LLM Eval Platform & Production Monitoring 2025 | Python, FastAPI, PostgreSQL, CI/CD | github.com/venkatalakshmiparimala/AgentProbe

- Open-source AI ops eval platform: offline golden-dataset evals, LLM-as-judge scoring, online quality metrics, CI regression harness gating releases on eval thresholds, cost-aware routing across Anthropic, OpenAI, Azure OpenAI, AWS Bedrock, Groq, and Ollama. Full tracing and structured logging per run. Built because I needed reliable evals before shipping AI to production - existing tools didn't do what I wanted.

AI on FHIR — Clinical NLP & Domain Process Automation 2024 | Python, Flask, React, BERT, LLMs, FHIR REST APIs, Docker | github.com/venkatalakshmiparimala/AI_on_FHIR

- Translates natural-language questions into FHIR REST API calls using LLMs, BERT, and embeddings - cut manual clinical lookup time ~60%. HIPAA-style RBAC, OAuth-secured API integration, containerized with Docker. Another example of taking messy real-world domain processes and making them

faster without removing the human where it matters.

EDUCATION

M.S. Data Analytics Engineering — George Mason University, Virginia | GPA 3.87 May 2026

B.Tech Computer Science & Engineering — JNTU Anantapur 2017
